

RESPONDING TO GLOBAL HEALTH NEEDS: THE TASC3 IQC

Improving Quality and Access to Health Services
for Underserved Populations Worldwide

The Population, Health, and Nutrition Technical Assistance and Support Contract 3 – Global Health (TASC3 – Global Health) is a worldwide mechanism that allows USAID Missions and Bureaus to easily access high quality technical assistance and support to implement Strategic Objectives that contribute to the Agency’s goal to improve global health in the areas of population, health, nutrition and infectious diseases.

CAMRIS International leads a team of industry leaders in this TASC3 small business set-aside IQC. CAMRIS is also a certified SDB, 8(a) and SDVOB firm.

The CAMRIS Team: Solutions for Transformational Development in Global Health

The CAMRIS Team brings proven and recognized institutional capabilities that demonstrate a worldwide network of highly effective organizations capable of supporting USAID Missions and Bureaus to implement the agency's Strategic Objectives to improve global health in the areas of population, health, nutrition, and infectious diseases.

We offer a **dedicated team**, with decades of experience in global health, and proven and recognized technical and management expertise, capable of providing USAID and local counterparts with responsive, rapid, cost effective, flexible, state-of-the-art quality technical assistance in: Service Delivery, Health Policy Reform, Community Mobilization and Individual Behavior Change, Monitoring and Evaluation, Capacity Building, and Commodities System Management.

The CAMRIS team includes subcontractors representing a broad and diverse set of technical capabilities to draw upon. As the prime contractor, CAMRIS will ensure a seamless blending of these capabilities to effectively manage individual task orders in a responsive, timely and cost-effective manner.

The CAMRIS TASC3 IQC Team includes major subcontractor, JHPIEGO, and subcontractors: Global Flu Consortium, GRM International Group Ltd, International Youth Foundation, LTG Associates, Inc., Medical Missions for Children, National Alliance of State and Territorial AIDS Directors, Public Health Institute, Safe Blood International Foundation, Tulane University's Payson Center for International Development and Technology Transfer, University of the Pacific School of International Studies, University Research Co., West African Health

Organization, and World Learning for International Development.

CAMRIS International: Fifty Years of International Development Experience

CAMRIS International implements and transforms health services, systems and programs to achieve high standards of governance and performance. We are dedicated to meeting the needs of underserved and vulnerable populations worldwide. CAMRIS is highly experienced in managing complex scopes of work. We employ systems for contract management and financial accountability that meet the highest standards of US Government contracting. CAMRIS has managed and implemented more than 1,300 projects and programs for more than 300 clients in nearly 50 countries in all regions of the world. Our experience spans more than 50 years, including over 40 years of continuous service to USAID and its predecessor, the Alliance for Progress, with projects ranging from small evaluation assignments up to complex bilateral health services implementation projects and indefinite quantity contracts. Our central focus is in the global health sector, including health systems organization and management, health finance, health governance and policy, basic services, infectious diseases, performance assessment, and the implementation of eHealth services.

JHPIEGO is a major subcontractor to CAMRIS International. An affiliate of Johns Hopkins University, JHPIEGO is a leading partner of choice for bi-lateral and multi-lateral funding agencies, governments, development assistance agencies, foundations, and corporations seeking to increase access and reduce barriers to high quality health care services through human resource capacity development. JHPIEGO's capabilities focus on production of health

CAMRIS Team Technical Capabilities

- Family Planning/ Reproductive Health
- Maternal/Neonatal Health
- Child Health/Survival
- HIV/AIDS
- Infectious Diseases
- Health Systems
- Health Governance
- Gender
- Food Security
- Management of Chronic Disease

care professionals and community providers through direct training and/or strengthening of learning systems, deployment of human resources, performance management and support focusing on the application of standards-based quality improvement processes, and incremental advancement of health care delivery systems by identifying and bringing important public health/service delivery innovations into everyday practice. JHPIEGO applies these core competencies while being supportive of policy advocacy, planning, accreditation and quality assurance, human resource administration and outcomes/ outputs monitoring. JHPIEGO's technical areas include, but are not limited to, family planning/reproductive health, MNH, HIV/AIDS and infectious diseases.

Additional Partners and Major Areas of Emphasis:

Global Flu Consortium (GFC): global flu pandemics including avian flu.

GRM International Group Ltd (the GRM Group): primary health care systems, HIV/AIDS treatment, prevention and counseling, MCH and family planning, sexual and reproductive health, and health education and community participation.

International Youth Foundation (IYF): capacity building of youth serving organizations and scaling up best practices in HIV/AIDS individual behavior change models.

LTG Associates, Inc. (LTG): MNH, CHS, nutrition, infectious diseases, HIV/AIDS, health policy, conflict management and health, and health system reform.

Medical Missions for Children (MMC): real-time treatment of critically ill children, by delivering pre-recorded lectures, and training sessions, to a global audience of millions

of physicians and nurses, and thousands of hospitals and major universities.

National Alliance of State and Territorial AIDS Directors (NASTAD): peer-based TA in monitoring and evaluation, community mobilization, evidence-based decision making, strategic planning, health policy reform, program management, and surveillance.

Public Health Institute (PHI): reproductive health, chronic and infectious diseases, youth leadership, population and the environment, HIV/AIDS prevention, and research.

Safe Blood International Foundation (Safe Blood): youth blood donor programs, behavior modification, blood donor recruitment, pre and post donation counseling training, laboratory quality assurance programs, and blood utilization training.

Tulane University's Payson Center for International Development and Technology Transfer: infectious diseases, surveillance, epidemiology, nutrition, food security, health information systems, and evidence based public health.

University of the Pacific (UOP), School of International Studies (SIS): HIV/AIDS, infectious diseases, pharmaceuticals, food security, gender, and research.

University Research Co. (URC): health systems strengthening, quality assurance and workforce development.

West African Health Organization (WAHO): capacity building, information, promoting cooperation, coordination and advocacy, and harnessing information technology to improve health outcomes.

World Learning for International Development (WLID): grants management, capacity building, training and exchange.

ADVANCING SOLUTIONS, CONNECTING OPPORTUNITIES, BUILDING A BETTER WORLD

CAMRIS International is a Certified:

- Small Disadvantaged Business (SDB)
- 8(a) Program Participant
- Service Disabled Veteran Owned Business (SDVOB)

OUR APPROACH: GROUNDED IN LOCAL REALITIES

Our approach is to be responsive to USAID and host country needs, and is centered on connecting opportunities and creating partnerships among communities, civil society, government and the private sector to encourage local ownership of the development process.

We go about doing our work by:

- Working with clients, counterparts and communities to design solutions
- Developing and scaling-up best practices to improve services and systems
- Planning and managing resources effectively to build and sustain local capacity
- Introducing innovative technologies to enhance program outcomes
- Integrating program elements that link relevant sectors for impact and uptake
- Monitoring, assessing and disseminating program results and lessons learned to continue transformational development
- Complementing existing efforts, including those of USAID and other donor agencies
